MACHINES—MINERALS—KNOW-HOW

SCANMASKIN 650

The Scanmaskin 650 is a robust and stable grinder, fully constructed from steel. This floor grinder is designed for both residential and commercial projects, featuring a grinding width of 650 mm.

The Scanmaskin 650 is extremely durable and easy to maintain. It is also designed to reduce vibration and strain-related injuries for the operator. Additionally, the Scanmaskin 650 offers the option for wet grinding by simply connecting a water hose.

The machine is equipped with our patented drive system to power its three grinding heads. This drive system is built with high-quality components, including a double-sided timing belt combined with a gear ring. These carefully selected components ensure high operational reliability and superior quality.
