

SCANMASKIN 650 PROPANE

The Scanmaskin 650 Propane is a robust and stable machine, designed to be operated 100% from propane. This makes it very flexible in many different applications, since it has the ability to operate in virtually any environment (must be well ventilated or outside).

The Scanmaskin 650 Propane is great for outdoor applications where there are limited power options. Of course you can also use the machine indoors, but must have good cross ventilation for operator safety.

The machine is equipped with a 22 liter water tank which provides a self contained solution for wet grinding. This allows an operator to wet grind with no cables or hoses attached. With its additional weight and motor power, the Scanmaskin 650 Propane is very powerful for its size yet efficient on fuel.

The Scanmaskin 650 Propane uses a patented planetary system to drive its three heads drum, which are powered by a double-sided cog belt and gear ring. This design helps reduce the amount of stress and torque on the operator.

GRINDING MACHINE DRIVEN BY PROPANE

GRINDING DISC
PLANETARY

GRINDING WIDTH
650 mm / 25,6"

WEIGHT
382 kg / 842 lbs
