

## SCANMASKIN 330 / 330 RS

The Scanmaskin 330 is a powerful and easy to use grinder, and is one of the most versatile machines on the market. The 330 mm/13 inch single grinding disc is effective for grinding smaller areas, edging long stretches of the floor, lite coating removal and surface prep.

A simple and quick adjustment allows the operator to change the configuration of the Scanmaskin 330 from a small grinder into an edger, with the entire process taking less than one minute.

The 330 mm/13 inch disc on the Scanmaskin 330 can be configured with 3, 6, or 9 of our metal, ceramic, or resin bond diamond tools. This allows the grinder to cut more aggressively when necessary, or grind softer surfaces by spreading out the weight and using more tools.

For smooth and simple transport, the Scanmaskin 330 can easily be separated into two parts, each weighing well under 100 lbs.

There are an optional 14.5 kg / 32 lbs weight available for Scanmaskin 330. The weight kit only fits Scanmaskin 330 1-phase 110 V/230 V and Scanmaskin 330RS 1-phase 115 V.

The Scanmaskin 330 RS is equipped with adjustable speed.
