PRODUCT DESCRIPTION

World Series Mat is a water-based silane- and acrylic-based stain protectant with excellent water and oil-repellent effect.

FUNCTIONS

World Series Mat reduces the penetration of water, liquids, grease, oils and other salts. The product leaves a strong dirt- and stain-resistant surface that is easy to maintain and keep clean.

World Series Mat water absorption of, but still allows steam to pass through the surface (diffusion open). The active ingredients are UV-resistant and therefore do not yellow.

AREAS OF USE

World Series Mat is applied to steel polished, or grinded concrete floors as well as industrial leveling compounds. The areas of use includes industrial flooring in commercial facilities (production and logistics halls), market halls, shopping centers, and supermarkets for indoor and outdoor use.

To permanently reduce the absorption capacity of concrete, pre-treatment of the surface with World Series Proof (in relatively dense concrete or if there is additional moisture) or World Series Proof is recommended World Series Close to sealing and reinforce strongly absorbent substrate.

AREAS OF USE:

- Concrete
- Car park, garage
- Industrial and warehouse floors
- Grocery stores
- Public environments and shops
- Workshops
- Refrigerator and freezer room
- Ventilation room
- Environmental and waste room
- Worktops and concrete furniture

BENEFITS:

- Strong water repellency
- Oil and grease repellent
- Protects aesthetic values
- Environmentally friendly
- 0.0% VOC
- Open for diffusion
- Reduces maintenance
- Dust binding
- Easier to keep clean
